

Module 1 Lesson 6

The Montessori Mathematics Materials

In this lesson you are provided with pictures of the Montessori Mathematics Materials that are traditionally used in the Montessori classroom for the topics covered in this course.

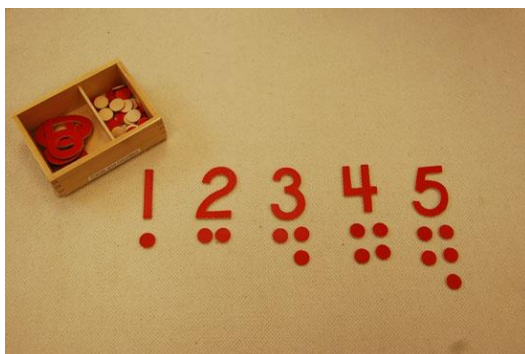

For most of the lessons I would be using Montessori Inspired Materials to teach what you need to do with the children and provide links for you to see how the presentations are done in the actual Montessori classrooms.

This way you will not be discouraged from doing what you have learned just because you do not have the Montessori Materials readily available.

1. The Sandpaper Numbers

2. The Counters and Numbers

3. The Number Rods

4. The Spindle Box

5. The Short Bead Stairs

6. The Golden Beads

7. The Teen Boards

8. The Ten Boards

9. The Hundred Board
